AI Product Lead for browser agents, enterprise AI platforms, and production eval loops. Took Redblock's AI Studio from 0→1 with production agents across 4 banks and enterprises, \$1M contracted in year one, and design partners including a Tier-1 US bank and top global card network. Previously launched India's first pre-onboarding fraud score, generating \$4M ARR and preventing \$12M in fraud losses. Engineer by training, hands-on with agent orchestration, eval harness design, Python, and SQL.

EXPERIENCE

Redblock.ai, Product Lead, AI Studio

Feb 2025 – Present

Founding product lead for an on-prem AI Studio that lets enterprises build and deploy browser agents for IT and security workflows across legacy, disconnected, and non-API systems. Stack: open-source LLMs, browser / GUI agents, custom agent orchestration, workflow execution, eval harnesses, and enterprise deployment.

- Lead a **12-person product and engineering org**, owning AI Studio strategy, roadmap, delivery, and design-partner feedback loops
- Took AI Studio from 0→1, shipping production browser agents across **4 banks and enterprises** for use cases including application onboarding, credential rotation, and ticket automation
- Landed a **Tier-1 US bank** and a **top global card network** as anchor design partners; shaped initial use cases and converted POCs into **\$1M in contracted revenue** in year one
- Defined core AI Studio primitives, **AI Skills, Agents, Pipelines, and Deployments**, so teams could compose tools, knowledge, actions, and control flow into reusable pipelines for IGA, PAM, and ITSM workflows
- Created **redflow**, a patent-filed proprietary DSL that lets users pass intent and skill-specific instructions to agents with execution guardrails; enabled new AI Skills to be created and deployed in under **60 minutes**
- Productized **browser / GUI agents** that execute tasks across enterprise web apps without stable APIs, with eval harnesses for workflow accuracy, safe tool use, and regression testing before rollout

BureauID, Senior Product Manager, Fraud Score

Nov 2023 – Feb 2025

Compliance and fraud platform for banks and fintechs across India and SEA.

- Launched India's first pre-onboarding **AI fraud score**, generating **\$4M ARR in 24 months** with adoption by **India's top 6 banks** and leading fintechs
- Identified **170K+ fraudulent accounts**, reduced false alerts **71%**, and prevented **\$12M** in fraud losses using proprietary models and graph features
- Improved **6- and 9-month retention 40%** by refining ICP, use cases, pricing, and sales channels through 12 months of PMF experiments
- Increased product margins **47% in 15 months** by replacing third-party data vendors with internal data products and proprietary risk signals
- Expanded into **Southeast Asia** and new-to-credit lending, adding bank and mid-market lender segments while supporting **4M monthly transactions**

BureauID, Product Manager, Platform

Dec 2022 – Nov 2023

Internal platform for configurable scoring, verification workflows, and client onboarding.

- Built BureauID's proprietary **Score Engine**, a configurable decisioning platform powering fraud and verification products for **35+ clients** and **50M+ monthly transactions**
- Launched **Bulk Verification** and onboarding tools that drove **60% of revenue**, cut turnaround time **70%**, improved time-to-value **15%**, and reduced onboarding TAT **25%**

Blaze by BureauID, PM, RTO Guarantee & 1-Click Checkout

Oct 2021 – Dec 2022

B2B2C commerce products for checkout conversion and return-risk reduction.

- Built **RTO Guarantee**, a risk-scoring product for D2C commerce that reduced return-to-origin rates **15%** and protected **\$10M/month** in GMV across **70+ brands**
- Launched **1-Click Checkout**, a B2B2C checkout product for Shopify and WooCommerce merchants that reduced checkout drop-off **25%**

EDUCATION

Indian Institute of Technology, Roorkee, B.Tech, Electrical Engineering · *March 2017*

President, Students' Affairs Council (SAC), led student governance reforms and a landmark 24/7 campus access initiative benefiting 10K+ students

SKILLS

AI / Agents: Browser agents, agent orchestration, tool use, eval harnesses, agent reliability, agent observability, open-source LLMs

Product: 0→1 AI products, platform PM, developer/customer-facing tools, design partners, enterprise GTM, pricing, discovery, roadmap

Technical: Python, SQL, API concepts, workflow execution; reads code, prototypes evals, ships internal tools
