

APURWA SARWAJIT

8979791361 · apurvsingh28@gmail.com · linkedin.com/in/apurwa-sarwajit · github.com/apurwa

Technical product manager, hands-on with Python, SQL, and TypeScript; publishes open-source packages on npm, including an MCP server. Took Redblock's AI Studio from 0→1 with production browser agents across 4 banks and enterprises, \$1M contracted in year one. Previously launched India's first pre-onboarding fraud score (\$4M ARR, adopted by India's top 6 banks) on a platform processing 50M+ monthly transactions. IIT Roorkee engineer; side projects shipped end-to-end with AI coding agents.

EXPERIENCE

Redblock.ai, Product Lead, AI Studio

Feb 2025 – Present

Founding product lead for an on-prem AI Studio for enterprise browser agents across legacy, non-API systems; lead a 12-person product-and-engineering org.

- Took AI Studio from 0→1, shipping production browser agents across **4 banks and enterprises** for application onboarding, credential rotation, and ticket automation
- Built **eval harnesses** for workflow accuracy, safe tool use, and regression testing; every agent release gated on eval results before rollout
- Built **muscle memory** for browser agents, replaying learned action paths to cut repeat-task execution time **60%**
- Created **redflow**, a patent-filed proprietary DSL that lets users pass intent and skill-specific instructions to agents with execution guardrails; new AI Skills created and deployed in under **60 minutes**
- Defined core AI Studio primitives (**AI Skills, Agents, Pipelines, Deployments**) so teams compose tools, knowledge, actions, and control flow into reusable pipelines for IGA, PAM, and ITSM workflows
- Landed a **Tier-1 US bank** and a **top global card network** as anchor design partners; converted POCs into **\$1M in contracted revenue** in year one

BureauID, Senior Product Manager, Fraud Score

Nov 2023 – Feb 2025

Compliance and fraud platform for banks and fintechs across India and SEA.

- Launched India's first pre-onboarding **AI fraud score**, generating **\$4M ARR in 24 months** with adoption by **India's top 6 banks** and leading fintechs
- Ran **12 months of growth and PMF experiments** across ICP, use cases, pricing, and sales channels; improved 6- and 9-month retention **40%**
- Identified **170K+ fraudulent accounts**, reduced false alerts **71%**, and prevented **\$12M** in fraud losses using proprietary models and graph features; worked hands-on in SQL on feature analysis and threshold tuning
- Increased product margins **47% in 15 months** by replacing third-party data vendors with internal data products and proprietary risk signals

BureauID, Product Manager, Platform

Dec 2022 – Nov 2023

Internal platform for configurable scoring, verification workflows, and client onboarding.

- Built BureauID's proprietary **Score Engine**, a configurable decisioning platform powering fraud and verification products for 35+ clients and **50M+ monthly transactions**
- Launched **Bulk Verification** and onboarding tools that drove **60% of revenue** and cut turnaround time **70%**

Blaze by BureauID, PM, RTO Guarantee & 1-Click Checkout

Oct 2021 – Dec 2022

Checkout conversion and return-risk products for D2C commerce.

- Launched **1-Click Checkout** for Shopify and WooCommerce merchants, cutting checkout funnel drop-off **25%**
- Built **RTO Guarantee**, a risk-scoring product that reduced return-to-origin rates **15%** and protected **\$10M/month** in GMV across **70+ brands**

PROJECTS

- **gdocs-mcp**: open-source MCP server for Google Docs & Sheets (TypeScript, MIT) · github.com/apurwa/gdocs-mcp
- **MCP server for browser agents**: lets MCP clients like Claude drive a live browser through exposed agent actions
- **cc (Claude Command Center)**: CLI orchestrating parallel Claude Code agent sessions across projects (Node.js + tmux) · github.com/apurwa/zz
- **browser-agent-chat**: web chat app for driving a live browser agent with a streamed browser view (React, Node.js, Magnitude) · github.com/apurwa/browser-agent-chat
- **SafeAgents (building now)**: agentic pentesting for AI agents; adversarial agents attack an enterprise agent pre-production and issue an independent security report
- **Split**: expense-sharing and budgeting iOS app for couples (React Native / Expo), self-hosted on the home intranet so financial data stays local

EDUCATION

Indian Institute of Technology, Roorkee, B.Tech, Electrical Engineering · 2017 · President, Students' Affairs Council

SKILLS

AI / Agents: Browser agents, agent orchestration, MCP, Claude Code / agentic coding, context engineering, tool use, eval harnesses, agent observability, open-source LLMs

Technical: Python, SQL, TypeScript / Node.js, system design, npm publishing; ships side projects end-to-end

Product / Growth: 0→1 AI products, conversion and funnel optimization, PMF experimentation, retention, pricing, platform PM, design partners, enterprise GTM
